In 1958 Dr. Medcof distributed a circular on sources of information for oyster growers. It listed 56 Government of Canada reports, produced since 1931, and pointed out the need for informed action if the oyster industry is to prosper. During the last 5 years, six additional reports have appeared dealing with various aspects of oyster culture and the shellfish resource. They are listed below with numbers from 57 to 62, along with the titles of all other earlier reports that are still available for distribution.
